DEPARTMENT OF THE ARMY
CHICAGO DISTRICT, CORPS OF ENGINEERS
219 SOUTH DEARBORN STREET
CHICAGO, ILLINOIS 60604

12 May 1975

Mr. Donald A. Wallgren
Federal Activities Coordination Branch
Surveillance and Analysis Division
U. S. Environmental Protection Agency
230 S. Dearborn Street
Chicago, Illinois 60604

Dear Mr. Wallgren:

This is in reference to a permit application by the United States Steel Corporation for dredging at Gary Harbor and South Works, North and South Slips. Disposal will be at the contained area east of Gary Harbor.

The applicant has a laboratory capable of performing the water quality analyses required in connection with this project. The applicant has also agreed orally to perform these analyses in accordance with NPDES standards.

Since the applicant has the facilities and the expertise to perform these analyses, and since the use of its laboratory will probably result in faster reporting, this arrangement appears unobjectionable. It should also be pointed out that Soil Testing, Inc. will continue to analyze water quality at the South Works dredge sites.

Please give us your comments on this arrangement.

Sincerely yours,

JAMES P. JONES
Chief, Operations Division
